Summary

AI and Data Science Engineer skilled in machine learning, NLP, and predictive modeling using Python. Experienced in data analysis, pipelines, and model optimization for delivering data-driven insights.

Technical Skills

Languages: Python, Java, SQL

ML & AI: Machine Learning, NLP, Deep Learning, ANN, Supervised & Unsupervised Learning

Tools: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Jupyter, Git, Matplotlib, Seaborn

Concepts: Data Structures, OOP, DBMS, Probability, Statistics, Optimization

Experience

Machine Learning Intern

Suvidha Foundation

Mar 2026 – Present

- Selected for ML internship; preparing for real-world projects involving data analysis, model development, and deployment.

Software Developer Intern

MAA AMBAY ASHIRWAD GP, Bhopal

Dec 2025 – Jan 2026

- Built a Python-based production and billing system using PySide6 with encrypted CSV data handling.
- Automated workflows improving billing efficiency by 40% and streamlining daily operations.

Data Science Intern

TECHNO PLANNERS, Bhopal

Oct 2025 – Dec 2025

- Processed banking, YouTube, and advertising datasets for EDA and preprocessing.
- Built ANN/MLP models improving prediction accuracy by 18% using TensorFlow and PyTorch.

Data Science Intern

FINLATICS

Jan 2025 – Mar 2025

- Analyzed 5,000+ marketing records improving targeting insights by 20%.
- Optimized ETL pipelines increasing efficiency by 40%.

Robotics Intern

WISSENSQUELLE

Oct 2024 – Dec 2024

- Performed kinematic analysis of industrial robots using RoboAnalyzer and CPRog.
- Improved motion accuracy by 15% and reduced errors by 10% through workflow simulation.

Projects

Sarcasm Detection Model

Python, NLP

- Built multilingual sarcasm detection model using Hugging Face and Google Translate.
- Achieved 70% accuracy on 10,000+ text samples.

Predictive Modeling System

Python, ML

- Built supervised learning models for demand forecasting using regression and classification.

Neural Network from Scratch

Python

- Implemented neural network with forward and backpropagation from scratch.

AI Agents Automation

Python, n8n

- Built AI agents to automate workflows and decision-making processes.

Education

VIT Bhopal University

Integrated M.Tech in Computer Science (AI & ML)

2022 – Present

Certifications

AgentBlazer Champion 2026 – Salesforce

Generative AI and ML – RemarkSkill

Python for Machine Learning – Learntube
