EDUCATION

VIT Bhopal University

2022 – Present

Integrated M.Tech in Computer Science (AI & ML)

SKILLS

Programming: Python, SQL

Machine Learning & AI: Machine Learning, Deep Learning, NLP, ANN, Computer Vision, Feature Engineering

Data Analysis: Statistical Analysis, Data Analysis, Data Visualization

Tools & Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch

Other Tools: Git, PySide6, n8n, Salesforce

Core Concepts: Data Structures, OOP, DBMS, Probability, Linear Algebra, Numerical Optimization

EXPERIENCE

Machine Learning Intern – Suvidha Foundation

Mar 2026 – Present

- Selected for ML Internship focusing on data analysis, model development, and deployment of ML solutions.
- Currently working on the Research Project Advancement of NewsSumm to NewsSumm++.

Software Developer Intern – Maa Ambay Ashirwad GP, Bhopal

Dec 2025 – Jan 2026

- Built Python-based production and billing system using PySide6 with encrypted CSV handling.
- Improved billing efficiency by 40% and automated factory workflows.

Data Science Intern – Techno Planners, Bhopal

Oct 2025 – Dec 2025

- Performed EDA on banking, YouTube, and ad datasets using Python.
- Built ANN/MLP models using Scikit-learn, TensorFlow, and PyTorch.
- Improved prediction accuracy by 18% for business strategy optimization.

PROJECTS

Sarcasm Detector (Multilingual)

Python, NLP

- Developed a multilingual sarcasm detection system using Hugging Face Transformer models (BERT-based) for contextual understanding of text.
- Performed extensive text preprocessing including tokenization, stopwords removal, and normalization to improve model performance.

Neural Network from Scratch

Python, NumPy

- Implemented a fully connected feedforward neural network from scratch using NumPy without relying on high-level ML libraries.
- Designed forward propagation and manually derived backpropagation using chain rule for gradient computation.
- Implemented gradient descent optimization with configurable learning rate for model training.

NewsSumm++ (Optimized News Summarization Dataset)

Python, NLP, Data Engineering

- Designed and developed an optimized news summarization dataset (NewsSumm++) by refining and cleaning large-scale raw news corpora.
- Performed advanced text preprocessing including deduplication, normalization, tokenization, and vocabulary optimization to improve dataset quality.

CERTIFICATIONS

- AgentBlazer Champion 2026 (Salesforce)
- Generative AI and Machine Learning – RemarkSkill
- Python for Machine Learning – Learntube
