

Jayesh Keswani

AI & Data Science Intern

-  Bhopal, India
-  +91 9343763531
-  jjayesh2036@gmail.com
-  <https://www.linkedin.com/in/jaykes/>
-  <https://github.com/THATSjai>

Skills

- Python
- Java
- SQL
- Machine Learning
- Natural Language Processing
- Predictive Modeling
- Statistical Analysis
- Feature Engineering
- Deep Learning
- Artificial Neural Networks
- Supervised Learning
- Unsupervised Learning
- Data Analysis
- Data Visualization

Tools

- Pandas
- NumPy
- Scikit-learn
- Jupyter
- Git
- Matplotlib
- Seaborn
- TensorFlow
- PyTorch
- PySide6

Core Concepts

- Data Structures
- Object Oriented Programming
- Database Management Systems
- Probability
- Statistics
- Numerical Optimization

Certifications

- AgentBlazer Champion 2026 (Salesforce)
- Generative AI and ML (RemarkSkill)
- Python for ML (Learntube)

Profile

AI and Data Science Engineer specializing in machine learning, natural language processing, and predictive modeling using Python. Experienced in building data pipelines, performing data analysis and visualization, and optimizing models through feature engineering and hyperparameter tuning. Demonstrated impact by improving model accuracy, reducing processing time, and delivering data-driven insights. Skilled in supervised and unsupervised learning, model training, and model evaluation.

Experience

- Dec 2025 – Jan 2026

Software Developer Intern MAA AMBAY ASHIRWAD GP, Bhopal
Built a production management system handling 50+ datasets daily using Python. Automated data pipelines, reducing manual errors by 25% and saving 15+ hours weekly. Enhanced demand forecasting accuracy using machine learning models for inventory optimization.
- Oct 2025 – Dec 2025

Data Science Intern TECHNO PLANNERS, Bhopal
Processed and analyzed 20,000+ data records using Python for exploratory data analysis. Boosted model accuracy by 18% through feature engineering and supervised learning algorithms. Validated models using cross-validation techniques to ensure consistency.
- Jan 2025 – Mar 2025

Data Science Intern FINLATICS
Analyzed 5,000+ marketing campaign records using KPI metrics, strengthening customer targeting insights by 20%. Optimized ETL pipelines using Python and Pandas, accelerating data processing efficiency by 40% and reducing execution time. Created data visualizations to support business decision-making.
- Oct 2024 – Dec 2024

Robotics Intern WISSENSQUELLE
Executed kinematic analysis of industrial robots including ARISTO, Gantry, and Stanford models using RoboAnalyzer and CPRog. Improved motion accuracy by 15% by identifying inefficiencies and optimizing configurations. Simulated robotic workflows, reducing error rates and enhancing system reliability.

Education

- 2022 – Present

Integrated M.Tech in Computer Science VIT Bhopal University
(Artificial Intelligence and Machine Learning)

Projects

- Sentiment Analysis for Sarcasm Detection** Python, NLP
Built an NLP-based model using TF-IDF and classification algorithms on 10,000+ text samples. Achieved high classification accuracy through model training, evaluation, and hyperparameter tuning.
- Predictive Modeling System** Machine Learning
Built supervised learning models for demand forecasting using regression techniques. Improved prediction accuracy through feature engineering and cross-validation.
